

# ABOLISH PRISONS!

## *prison as art form*

consider prison an art form of punishment  
preventing nothing but proximity to those we love

if torture as persuasion induces pain  
prison pain is a constant always there  
in the synapse of monotony a stasis the reflex  
that teaches don't feel anything don't feel

if nature heals why is nature banned ?  
if freedom heals why take it away ?

they put prisoners in the wild with means to survive  
the ice fields deserts the reaches of space  
excluded from our company to make something better  
they fell in love with others raised families  
you know some of them  
never force these into your failures  
where even the walls of cathedral temple mosque  
imprison by locking out

translate 'let us pray' as  
let us make freedom together
